

GROUP THEORY IN ALGEBRAIC STRUCTURES

DANIEL MACÍAS CASTILLO

CONTENTS

Preface	2
Part I: Group Theory	3
1. Introduction to group theory and examples	4
1.1. Definition and first properties	4
1.2. Examples	11
1.3. Homomorphisms	15
1.4. (More) Exercises	18
2. Subgroups	23
2.1. Definition and examples	23
2.2. Cyclic groups and cyclic subgroups	27
2.3. Lagrange's Theorem	34
2.4. (More) Exercises	38
3. Isomorphism theorems	42
3.1. Normal subgroups and quotient groups	42
3.2. The theorems	54
3.3. Simple groups and solvable groups	58
3.4. (More) Exercises	60
4. Group actions and Sylow's Theorem	66
4.1. Symmetric and Alternating groups	66
4.2. Group actions	69
4.3. Sylow's Theorem	81
4.4. (More) Exercises	88
5. Classification and products	94
5.1. Products	94
5.2. The Fundamental Theorem of finite abelian groups	106
5.3. (More) Exercises	119
References	121
